

Jerry Wu

bwee.app · jwu1100@icloud.com · linkedin.com/in/jerry1100

Senior engineer with 9 years of experience. Currently building creative AI tools at Figma, with a strong track record of shipping tasteful experiences. I love solving people's problems through seamless UX, and value strong product vision and craft.

Skills

- **AI/ML:** agentic workflows, prompt engineering, AI evals, novel interfaces for AI
- **Web:** React, TypeScript, JavaScript, HTML, CSS
- **Other:** C++, C#, SQL, Azure, Node.js, Electron.js

Work

[Bwee.app](https://bwee.app) – Seattle, WA

Feb 2026 – Present

- Built Bwee, a BYOUI (Build Your Own UI) local-first desktop app where you and your agents build custom tools tailored to exactly how you work.
- Designed a task management system for your agents to build and organize bespoke frontends. I use Bwee daily, with custom views for GitHub, Asana, and Slack, and a small fleet of Claudes to do my job.

Senior Software Engineer, Figma – Seattle, WA

Oct 2022 – Present

- Shipped [Weave Tools in Figma](#) at Config 2026, where it was [demoed during the keynote](#). This was Figma's first integration with Weave. Led 3 engineers, 1 designer, 1 PM, and countless cross functional partners to take this from concept to production.
- Shipped design-aware [Text Suggestions](#) at Config 2025. This was Figma's first always-on AI feature, with 100k+ daily users and an industry leading 50% accept rate.
- Shipped the [Tone Dial](#) at Config 2024, a 2D interface for adjusting the tone of text using LLMs, highlighted by [Anthropic's Head of Product](#).
- Shipped [Jambot](#), a node-based interface for LLMs and Figma's first foray into AI, in 2023. During a time when every SaaS product was injecting prompt boxes, this contributed to Figma being named one of [Fast Company's most innovative companies](#).
- Shipped an internal tool for bisecting web regressions in minutes. Led 3 engineers during our 2023 hackathon, it's now a core tool, having root caused 200+ regressions.

Software Engineer II, Microsoft – Redmond, WA

May 2021 – Sept 2022

- Built a CI pipeline to enable 1-click testing of web changes. Prior, engineers spent 30+ minutes per PR, switching then building branches. Deployed in Azure for <\$1/month.
- Pitched, then executed a full rewrite of the core PDF viewer, resulting in significantly simpler code as well as major improvements to the user experience
- Decreased JS bundle size by 91% via code splitting, minification, and compression

Software Engineer II, Microsoft – Bellevue, WA

Apr 2019 – May 2021

- Performed a live migration of bing's follow button (~3M daily views) to a modern stack

Education

University of Hawaii at Manoa

Aug 2013 – May 2017

B.S. Computer Engineering, GPA: 3.9/4.0
